

FCCGentlemen,

I recently became aware of the attempts by NAB to exterminate satellite radio XM & Sirius. I began to use XM radio in March 2004 when purchasing a new vehicle that provided XM installed in the radio CD, cassette loop. It has been a very refreshing new venue and an enjoyable refreshing transmission of on air music, news, financial data stream as well up to date weather. I have also found the comedy available to be immensely enjoyable and the OLD radio shows with Bob Hope, Bing Crosby, Jack Benny, The GREEN Hornet, the Lone Ranger and many others to be most amusing and entertaining to me and others riding with me. IT IS IMPOSSIBLE to get this form of entertainment from CRUMMY FM and I find this disturbing and disgusting.

Previously I seldom listened to the stale, crummy, trite and non functional FM radio broadcasting and generally only listened to CDs for PERSONAL entertainment. On occasion I listen to AM radio talks shows as the regular run of the mill FM stations are loaded with junk. The same stale programming 24/7 with no deviation that only wore on my nerves and generally aggravated me so badly that I would TURN OFF the stinking radio and drive on.

I am opposed to the NAB and all they stand for and am CERTAINLY opposed to their attempts to get the FCC involved. It is urgent that the FCC puncture the balloon of NAB and their brethren now and forever.

Thank you.

Sincerely,

Ken Barrett
